Clean Steam

Clean Dry Quick Recovery High Pressure Steam

GAS FIRED

OIL FIRED

GAS/OIL FIRED

Four-Pass Vertical Tubeless

High Performance Multi Featured Boiler

More Steam Storage:

Capacity to Handle Swing and Spike Loads- Quick Recovery - Quick Response

Larger Steam-Release Surface:

Reducing Carry Over of Unevaporated Water.

Four-Pass Design:

Producing Higher Efficiency and Eliminating The Metal Stress due to Uneven Heat transfer, Common in Other Designs.

Eye High Burner:

No Step Ladder is Needed or bending Over to Service Burner

The Furnace Crown is Water Cooled, Eliminating Troublesome refractory Breakdown inherent in units of inferior design.

No Fire Tubes, Water Coils or In-The-Fire Mud Rings to Burn Out.

Turbulent Flame:

Heat is Forced Down, With The Fire Whirling and Spinning Against its Natural Flow, Enhancing Recirculation, Mixing and heat Transfer.

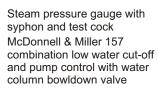

Series

Clean Steam VHP Series

STANDARD STEAM TRIM

McDonnell & Miller probe auxiliary low water cut-off and relay

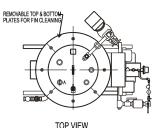

Water column gauge set with drain valve

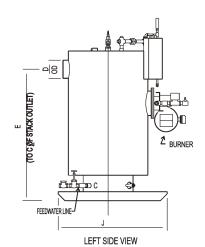

ASME safety relief valve Operating and high-limit pressure controls

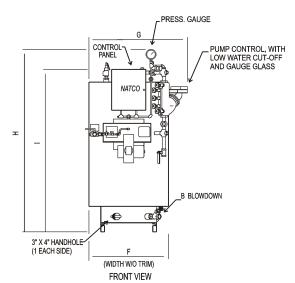

Feed check and shut-off valves included on boilers up to and including 30 Hp

Y-Type blowdown valve included on boilers up to and including 30 Hp

Steam outlet valve included on boilers up to and including 30 Hp

150# STEAM NATCO VHP SERIES SPECIFICATIONS

Available with design pressures to 300 PSIG. Low pressure steam or hot water models available. We assume no responsibility for errors in data Certified dimensions.

Specifications and drawings are available on request.

Outlet connections over 4"inch on low pressure model are 150# flanges. All other connections are NPT
